QUALITY, FROM START TO FINISH

unifabs.eu

With state-of-the-art facilities and extensive experience in all aspects of metal design and fabrication, we offer a range of processing, forming and finishing capabilities, covering all of your manufacturing needs.

From initial concept design through to powder coating and final assembly, we manufacture full industrial solutions for an enviable range of global brands. And with all work produced in line with our ISO 9001:2015 quality management accreditation, you can rest assured that your products will be manufactured to exacting standards.

With 60,840 sq. ft. of manufacturing facilities centrally located in the West Midlands, and a dedicated fleet of vehicles delivering nationwide, Unifabs is set-up to provide a truly end-to-end sheet metal fabrication solution.

"

Far more than end product fabrication. We operate as an extension to your business.

Partnering with you to
deliver more

At Unifabs we don't have customers, we build partnerships. From simple components to fully assembled products, we can assist with all of your sheet metal and fabrication needs, partnering with you to add value at every stage and deliver your products to market more efficiently.

Quality, from start to finish

Transforming sheet metal into parts and fully finished products. We utilise cutting-edge technology and the most appropriate and cost-effective methods for production.

PROCESSING CAPABILITIES

With automated load/unload cells maximising productivity, our processing capabilities offer versatility and precision in production.

- CNC Punch/Laser Combination Machines
- CNC Fibre Laser Cutting Machines
- CNC Turret Punch

FORMING CAPABILITIES

Our combination of two Salvagnini Panel Benders with eight Amada Press Brakes creates one of the most advanced, versatile, productive and complete metal folding cells available in the UK.

FABRICATION & WELDING

Production welding of mild steel, zintec, stainless and aluminium.

- MIG/TIG Welding
- Dedicated finishing area
- Automatic saw
- Spot welding machine
- Robotic welding

POWDER COATING CAPABILITIES

Our powder coating plant from Gema is one of the most advanced in the country. With quick colour changes and 1500 mm/min speed, we can process high volume parts, quickly and consistently.

ASSEMBLY

Our dedicated Assembly team bring your products to life.

- PEM and Inserts
- integration of non-sheet metal components
- Finished product packaging

Reducing costs through design

Our in-house team of industrial design engineers can create a wide range of solutions, from warehousing and distribution, to automotive tooling and line side ancillary items, making your concept a manufacturable reality.

We also ensure designs are cost-effective to produce and ready for mass manufacture through value engineering and design for manufacture services, adding value and supporting you at every stage of the process.
